Supporting Vue.js

Vue.js is an MIT-licensed open source project. It's an independent project with its ongoing development made possible entirely thanks to the support by these awesome backers. If you'd like to join them, please consider:

- Become a backer or sponsor on Patreon.
- Become a backer or sponsor on Open Collective.
- One-time donation via PayPal or crypto-currencies.

What's the difference between Patreon and OpenCollective?

🐟 Your Badge 🐟

Static

subject   status   color   [Make Badge]

```
https://img.shields.io/badge/<SUBJECT>-<STATUS>-<COLOR>.svg
```

Dashes `--` → `-` Dash
Underscores `__` → `_` Underscore
`_` or Space ` ` → ` ` Space

`color brightgreen` `color green` `color yellowgreen` `color yellow` `color orange` `color red` `color lightgrey` `color blue` `color ff69b4`

Dynamic

data type ⌄   label   url   query   color   prefix   suffix   [Make Badge]

```
/badge/dynamic/json.svg?url=<URL>&label=<LABEL>&query=<$.DATA.SUBDATA>&colorB=<COLOR>&prefix=<PREFIX>&suffix=<SUFFIX>
```

```
/badge/dynamic/xml.svg?url=<URL>&label=<LABEL>&query=<//data/subdata>&colorB=<COLOR>&prefix=<PREFIX>&suffix=<SUFFIX>
```

```
/badge/dynamic/yaml.svg?url=<URL>&label=<LABEL>&query=<$.DATA.SUBDATA>&colorB=<COLOR>&prefix=<PREFIX>&suffix=<SUFFIX>
```
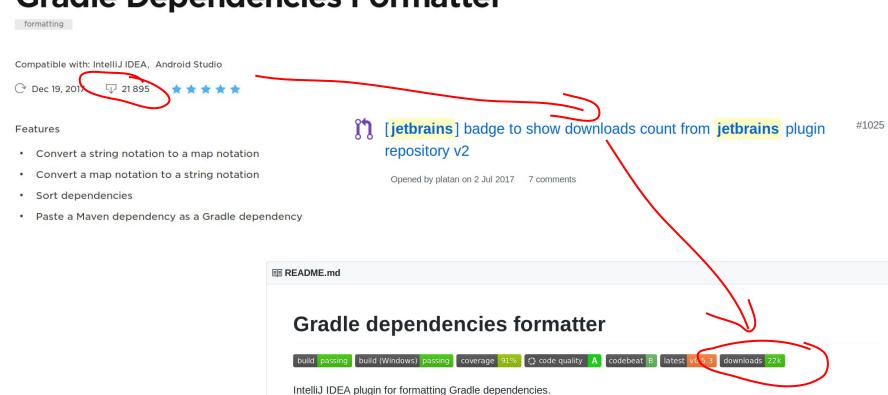

Example 1

Gradle Dependencies Formatter

formatting

Compatible with: IntelliJ IDEA, Android Studio

Dec 19, 2017   ⤓ 21 895   ★ ★ ★ ★ ★

Features

- Convert a string notation to a map notation
- Convert a map notation to a string notation
- Sort dependencies
- Paste a Maven dependency as a Gradle dependency

[**jetbrains**] badge to show downloads count from **jetbrains** plugin repository v2   #1025

Opened by platan on 2 Jul 2017   7 comments

📖 **README.md**

Gradle dependencies formatter
